

# CourseShare

## Share in the Future of HIM Education

AHIMA is pleased to introduce CourseShare, an exciting new direction in health information management (HIM) education! CourseShare is an exclusive, Web-based destination for HIM educators seeking to fill in or expand their courses with lectures, instructor notes, case studies, group projects, and other teaching materials shared by fellow educators and industry experts.

Inspired by a similar program at MIT, AHIMA intends to influence the future of the e-HIM® workforce by encouraging collaboration between HIM educators and leaders in academia and the industry.

### CourseShare Benefits

1. Tested and targeted teaching materials are available to educators looking for new ideas and perspectives on their subjects. It's free, and only available to educators who are AHIMA members.
2. Sharing materials and strategies is encouraged between HIM educators and industry participants to stimulate new ideas about the HIM field.
3. Materials are conveniently organized according to specific focus, knowledge clusters, learning levels, academic status, and other subject headings.

**Prepare for the future by interacting with fellow educators today.
