

# CDI ICD-10-CM Documentation Tips: Coma

- ICD-10-CM will expand “coma” to include coding for somnolence, stupor, and coma
  - Somnolence (R40.0) = drowsiness
  - Stupor (R40.1) = catatonic stupor or semi-coma
  - Coma (R40.2-) = unconsciousness
    - Any associated skull fracture or intracranial injury would be coded first
    - 7<sup>th</sup> character required
    - Glasgow (coma scale) score available
- Glasgow (coma scale) score available
  - Typically reported as a total score 0-15
    - Higher score = higher functioning
  - ICD-10-CM coding will need the score from each of the assessment areas
    - Eye opening
    - Verbal response
    - Motor response
